

SAKAR MANANDHAR

Address: Chabahil, Kathmandu, Nepal

Email: sakarmanandhar1@gmail.com

Phone No.: +977 9803376559

CAREER SUMMARY

Computer Engineering graduate with hands-on experience developing full-stack web applications and computer vision models. Proven ability to implement machine learning frameworks, construct server-side logic, and manage databases. Seeking an entry-level or internship opportunity to apply rigorous engineering principles in an AI or Software Development role.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, HTML5, CSS3, SQL
- **Frameworks & Libraries:** Node.js, React, Express.js, Tailwind CSS, YOLOv5, EJS
- **Databases:** MongoDB, PostgreSQL
- **Tools & Platforms:** Git, GitHub, AWS (Cloud Foundations)
- **Languages:** English (Professional Proficiency), Nepali (Native)

TECHNICAL PROJECTS

Kotha Khoj Web App — Full-Stack Room Rental Application/Minor Project

- Built and deployed a full-stack web application architecture designed to simplify local room-rental searches and listing matching within the Kathmandu Valley.
- Developed structured server-side application logic and secure RESTful APIs using Node.js and Express.js framework.
- Integrated MongoDB backend to handle complex database schemas, dynamic queries, multi-user authentication, and relational data structures.
- Designed a highly interactive, responsive user interface utilizing custom CSS structures and EJS template engines.
- Link: <https://kothakhaj.onrender.com/> (May take some few seconds to load for the first time)

Hand Gesture Recognition System — Final Year Major Project

- Developed a real-time sign language gesture recognition system leveraging YOLOv5 to accurately detect and classify dynamic hand gestures.
- Orchestrated the entire machine learning pipeline, including custom data collection, image pre-processing, targeted model training, hyperparameter optimization, and validation metric evaluations.

Python Automation & Micro-Projects

- Birthday-wishing application featuring automated email scheduling protocols, background task configurations, and external file data structures.
- Classic Snake game and an educational geographic state-name testing application. (Available in my portfolio website: <https://www.sakarmanandhar.com.np/>)
- Developed a dynamic To-Do management application utilizing Node.js, featuring multi-list creation architectures and persistence for individual task items. Link: <https://todo-app-p3v6.onrender.com/> (May take some few seconds to load for the first time)
- Developed a Mini Job Application Tracker Built with React, TypeScript, Node.js, Express, and PostgreSQL with basic Create Read Update Delete(CRUD) functions .Link: <https://mini-job-application-tracker-five.vercel.app/>

EDUCATION

Bachelor in Computer Engineering (BCT)

Kathford International College of Engineering and Management, Lalitpur (Tribhuvan University) | *Graduated: November, 2025*

NEC Registered: [License](#)

Intermediate in Science (+2)

GoldenGate International College, Kathmandu (National Examination Board) | *Completed: February, 2021* • CGPA: 3.36/4.00

TRAINING & CERTIFICATIONS

- AWS Academy Graduate – [AWS Academy Cloud Foundations](#) (4-Month Intensive Program) | June, 2024
